

MUHAMMAD UMAR

Flutter Developer | Mobile & Full-Stack Engineer

umarshad0309@gmail.com | +92 312 4345138 | linkedin.com/in/muhammad-umar-802235286

github.com/umarshad | m-umar.vercel.app | Lahore, Pakistan

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of production experience building and shipping cross-platform mobile applications used by real users. Delivered Firebase-backed apps, Stripe and PayPal payment integrations, ChatGPT-powered AI features, and real-time systems across multiple companies. Owns features end-to-end from database schema and Cloud Functions to pixel-perfect UI and Play Store release. Currently building at DM Worx LLC and open to high-impact roles where shipping matters.

CORE COMPETENCIES

Mobile: Flutter, Dart, cross-platform iOS and Android, adaptive UI, Play Store and App Store deployment

Backend & Cloud: Firebase (Auth, Firestore, Cloud Functions, FCM, Crashlytics), Supabase, Neon Database, AWS Elastic Beanstalk

AI & Integrations: ChatGPT API, Google ML-Kit, Stripe, PayPal, In-App Purchases, Get Stream Chat API, Google Maps

Automation: n8n workflow automation, Groq API, Gemini API, LinkedIn API, Pollinations AI image generation

Frontend: React, TypeScript, Node.js, PostgreSQL, Progressive Web Apps

Engineering: Feature-first modular architecture, Provider, Riverpod, Git workflows, CI/CD pipelines

Languages: English (Proficient), Urdu (Native)

PROFESSIONAL EXPERIENCE

Flutter Developer

DM Worx LLC — Remote | April 2025 – Present

- Built and maintained production Flutter applications backed by Firebase (Auth, Firestore, FCM, Cloud Functions) serving live users across Android and iOS.
- Integrated ChatGPT API and Stripe subscription flows into a live app, enabling AI-assisted guidance and recurring payment management for end users.
- Introduced feature-first modular architecture and Git-based code review, improving release consistency and reducing cross-feature regressions.
- Managed real-time Firestore operations and third-party API integrations across multiple live applications, maintaining production stability throughout.

Full-Stack Developer (Short-Term Contract)

Cygnus Ventures — Remote | Concurrent with DM Worx LLC | Oct – Dec 2025

- Delivered full-stack features using React, TypeScript, Node.js, and PostgreSQL within a structured production codebase, completing all deliverables on schedule.
- Designed and managed relational database schemas on Supabase and Neon Database, supporting scalable backend operations for a growing user base.
- Built admin panels and user-facing interfaces that consolidated reporting workflows, reducing manual oversight for internal operators.

Flutter Developer

Solution Soul — Lahore, Pakistan | Jun 2024 – Feb 2025

- Developed and deployed multiple cross-platform Flutter applications to production on Android and iOS, each shipped within agreed client deadlines.
- Implemented Firebase Auth and Firestore across multiple client projects, enabling secure multi-user access and real-time data sync.

- Built device-adaptive UI components tested across multiple screen sizes, achieving consistent UX parity between Android and iOS builds.
- Shipped complete admin panels and client-facing interfaces covering design handoff through to Play Store and App Store submission.

Flutter Developer Intern

Orbilon Technology — Lahore, Pakistan | Mar – Jun 2024

- Built Flutter screens and reusable UI components integrated directly into client-facing products, reviewed and approved by senior developers.
- Implemented Firebase Auth and Firestore features across multiple app modules, delivering production-ready work under senior supervision.
- Managed application state with Provider and Riverpod; identified and resolved performance bottlenecks before client delivery.

SELECTED PROJECTS

LinkedIn Automation System

Stack: n8n | Groq API | Pollinations AI | LinkedIn API | Google Sheets

- End-to-end automated content pipeline: given a niche, the system finds trending topics, generates a professional LinkedIn post via AI, and publishes it directly to LinkedIn without manual input.
- Integrated Pollinations AI to generate a context-aware image for each post, attached automatically at publish time.
- Google Sheets logging layer records every post, topic, and image prompt for review and tracking.

My Invoice — Mobile App *myinvoice.us*

Stack: Flutter | Firebase | Stripe | ChatGPT API | Cloud Functions | FCM | Google Maps

- End-to-end business workflow: create estimates, client approves, auto-converts to a tracked project with live progress management.
- Stripe integration covering secure transactions, subscription management, and automated payment reminder push notifications via FCM.
- In-app AI assistant powered by ChatGPT API for user support and smart workflow suggestions.

My Invoice — Web Platform *myinvoice.us*

Stack: React | TypeScript | Firebase

- Responsive marketing landing page and centralised admin panel giving operators full control over users, transactions, invoices, and analytics.
- Support chat integrated directly into the admin dashboard for real-time user query handling.

Clika App

Stack: Flutter | Firebase | Get Stream Chat API

- Tower management system with role-based access for super admins, companies, and field employees with real-time chat.
- Event and discount management with multi-tier user hierarchy and centralised admin control.

Realtors Lead *realtorslead.com*

Stack: React | TypeScript | PayPal API | Hosted on Namecheap

- Lead generation platform for USA-based real estate agents with real-time PayPal payment processing and automated email delivery.

Emotions Controller App

Stack: Flutter | Google ML-Kit | Python | AWS Elastic Beanstalk

- On-device real-time emotion detection via Google ML-Kit; deep cloud analysis routed to a Python backend on AWS Elastic Beanstalk.

Everpure Organics *everpureorganics.com*

Stack: React | TypeScript | Supabase | REST APIs | Hosted on DigitalOcean

- Full-featured e-commerce web application with dynamic product filtering, multi-tier pricing cart, user authentication, and a comprehensive admin dashboard.

My Madina *mymadina.site*

Stack: React | TypeScript | Supabase | Progressive Web App | Hosted on AWS EC2

- Navigation platform for pilgrims with coordinate-based interactive maps, bilingual English and Arabic support, and offline PWA capability.

EDUCATION

BS Computer Sciences

Lahore Garrison University | 2020 – 2024

- Graduated with a Bachelor of Science in Computer Sciences.

CERTIFICATIONS & AWARDS

- NexSkills Flutter Development Certification
- AIESEC Campus Ambassador — Youth Speak Forum 2023
